RIDERS (1690.)

British Merlin:

BEDECKT

With many delightful Varieties and useful Verities,

Fitting the Longitude and Latitude of all Capacities within the Islands of *Great Britain's* MONARCHY.

With Chronological Observations of Principal Note to this Year 1690.

BEING

The second from *Bissextile* or Leap-year.

To which is added,

The Sun and Moons Rising & Setting.

ALSO,

Useful *NOTES* of *HUSBANDRY*, *FAYRS* & *PHYSICK*, *MARTS*;

And Directions & Tables to all necessary Uses.

BIBLIOTHECA

Made and Compiled for the Benefit of his COUNTRY,

By CARDANUS RIDERS.

LONDON: Printed by *Edw. Jones*, for the Company of Stationers. 1690.

Profitable Observations and Notes.

ALL Measures of Longitude are deduced from Barley Corns: Three Barley Corns make an Inch, Twelve Inches one Foot, Three Feet one Yard, Five Yards and a half one Statute-Pole, or Perch; Forty Perches make a Furlong, Eight Furlongs make an English Mile, in a Mile are Three hundred and twenty Perches or Poles, One thousand sixty six Paces: Ells, One thousand four hundred and eight: Yards, One thousand seven hundred & sixty: Feet, five thousand two hundred & Eighty: Inches, Sixty three thousand three hundred & sixty; & Barley Corns, 190000 and 80. The Circumference of the Earth and Sea joyntly is 25036 Miles, and the Diameter 7966 Miles, and its Semidiameter 3983 Miles, according to English Mensuration.

The Dimensions of *England*, &c.

THE Length of *England* from South to North is 386 Miles, the broadest place from the Lands end to Sandwich is 279 Miles; the next broadest place, which is between St. Davids & Yarmouth in the East, is 240 Miles; the whole compass of *England* is 1532 Miles. The length of *Ireland*, North & South, is 303 Miles; the greatest breadth thereof, East and West, is 112 Miles; the whole compass of the main Land is 948 Miles. The greatest length of *Scotland*, South & North, is 480 Miles; and the breadth East & West is 165 Miles; the whole compass 1100 Miles. The Isle of Man is in length 28 Miles, the breadth 18 Miles, and in compass 91 Miles. The Isle of Anglesey is in length 21 Miles, in breadth 18 Miles, in compass 85 Miles. The Isle of Wight is in length 22 Miles, in breadth 11 Miles, in compass 57 Miles. The Isle of Guernsey is in length 13 Miles, in breadth 9 Miles, the whole circumference is 36 Miles. The Isle of Jersey is in length 10 Miles, in breadth 6 Miles, in compass 28 Miles.

ADVERTISEMENT.

AT the Sign of the *Golden Griffin* in *Bell-Savage-Yard* on *Ludgate-hill*, liveth *W. Boyse* the only *English Operator in Glass*, and the most expert in making *Artificial Eyes*, so that they cannot be easily distinguished from the *Natural Eye*: With many other neat Operations in Glass the like not done by any Pretender in *England*.

A Geographical Description of the World, containing *Europe*, *Asia*, *Africa* and *America*.

Europe contains in it these Provinces, Germany, Swedeland, Denmark, Italy, Muscovia, Hungaria, France, Spain, Polonia, Sclavonia, Norway, Grecia. The most eminent Islands are these, Great Britain, Ireland, Sardinia, Candia, Nigropont, and Corsica. The greatest length of this part of the World is 3000 Miles, the breadth 900.

Asia, the biggest of the four, and first known part of the World, contains these principal Regions and Islands, *viz.* Armenia, Anatolia, Persia, Assyria, China, Syria, Arabia, Mesopotamia, India, Parthia, Media, Palestine, Chaldea, Tartaria.

In *Africa* are these Provinces, *viz.* Ægypt, Barbary, Æthiopia, Nubia, Abassines, Monomotopa, Lybia. The Islands Magdagarde, St. Thomas, Insula de Cape Verde, Insula de Canaria, Insula de Madera.

America, the fourth part of the World, and of the lateſt discovery, consisteth of these two parts, Mexicana and Peruana. The Provinces of Mexicana are Nova Hispania, Terra Florida, Nova Albania, California, Norimbega, Nova Francia, Estotiland. The chief Islands of Mexicana are Greenland, Heland and Friesland. The Provinces of Peruana are Brasil, Pisal de Chibana, Peru de Cartanea, Chila, Charca, Chico, Patagores. The chief Islands of Peruana are Hispanicia, Cuba, Jamaica, and many others.

100	0	10	0	1	10	0	3	0	0	4	10	0	6	0	

The Use of this Table is this: If thou would'st know what the Interest of 100 and 5 l. is for 9 Months at 6 per Cent. then in the first Column find out 100 at the Foot of the Column, and right against it under the Title 9 Months, (which is the fifth Column) here you shall find 4 l. 10 s. And against the Number 5 l. you shall find 4 s. 6 d. So that the Interest of 100 and 5 l. for 9 Months, comes to 4 l. 14 s. 6 d. The same of all the rest.

Note, That the *Exchequer* opens eight days before any Term, except *Trinity*-Term, before which it opens only four days.

Note alſo, That the firſt and laſt days of every Term, are the firſt and laſt days of Appearance, as may be ſeen above in the Table.

The Subsiquent Diary Explained.

THE Year consisting vulgarly of Twelve Months, is contained in Twelve Pages. Each Month is divided into Nine Columns, in the First of which is placed the Days of the Month.

In the Second the Days of the Week, E being this Years Dominical Letters.

The Third contains the Feasts Fixed and Moveable, the Beginning and end of the Terms, Moons Rise and Setting.

The Fourth shews the Sign wherein the Moon is every day at Noon.

The Fifth shews the Hour and Minute of High-Water at London-bridge every day.

The Sixth hath a Diary Judgment of the Weather.

The Seventh on the Blank side is Sun-Rising.

The Eighth is Sun Setting every day in the year.

The Ninth Notes of Husbandry and Physick.

This is the season for good Husbands to lop and prune superfluous branches from Fruit-trees, uncover their Roots, set all kind of Quick-sets and Fruit-trees in the New of the Moon. Be sure the Wind be not North nor East; and set the same sides to the South and West, which grew at the first. Set Beans, Pease and Parsnips. The weather mild & Moon decreasing, dig Gardens, drench weak and sick Cattle, Kine with Verjuice, Horses with Water and Ground Malt, sodden with a little Bran.

In this Month let not Blood, nor use Physick, unless necessity constrain thee. Beware of taking cold; for Rheums and Flegm do much increase this Month. It's hurtful to fast long; to drink White Wine fasting is good. Use Meats that are moderately hot, for the best Physick is warm Diet warm Cloaths, and a merry honest Wife.

February hath xxviii days.

Now regarding the Wind and Weather, graft, cut Quickſets, cover the Roots of Fruit-trees (opened in *December* and *January*) with fat Earth; ſow Oats, Barley, Parſnips, Onions, Carrots, Melons, Cucumbers, and all kind of Pot-herbs; ſlip Artichokes and Sage, and ſow all manner of Garden-ſeeds.

Now adviſe with the honeſt and able Aſtrological Phyſician. It is good to purge and let blood, for in this month the humours and blood increaſe, and groſs feeding breeds groſs blood and humours; therefore uſe meats of good digeſtion, and ſuch as afford good juice and nutriment to the body. Forbear all things ſalt, purge the blood by potions and blood-letting. Sweet meats and drinks are commendable. Be ſure to eat in the morning before you drink.

April hath xxx days.

31	3 39	8 20

This Month commands the provident Housewife, and the prudent Artist, to set their Stills on work. In the beginning of the Month sow and set those tender Summer Herbs that would not endure the former cold. Weed your Hop Gardens, cut off superfluous Branches. Mow Trees and Gardens, and weed Corn, rise early, walk the Fields and Gardens.

Now every Garden and Hedge affords thee Food and Physick. Rise early, walk the Fields by running streams, the North and West sides. Sage and Sweet Butter, an excellent break-fast. Clarified Whey with Sage, Scurvey-Grass Ale, and Worm-wood Beer, are wholesome Drinks. Green Whey excellent against Choler, Eat and drink betimes in the morning. Abstain from Meats that are hot in Nature, and salt in Quality.

June hath xxx days.

At the Full of the Moon this Month and next, gather your herbs to keep dry for the whole year. Set Rosemary and Gilliflowers, sow Lettice and Rhadish three or four days after the Full, and they will not run to seed. Shear your Sheep, the Moon increasing. Take heed of cutting Herbs or Flowers with knife, but rather gather them with your fingers.

Let honest moderate Labour and Exercise procure your Sweat. Use thin and light Diet, and chaste thoughts tend to health. Lie not unadvisedly on the ground, or overhastily drink.

Distilling of Roses, and making of Syrups and Conserves are now in prime: Use a light and thin Diet, for the Stomach is weaker now than in the former Months. Clarified Whey boiled with cool Herbs, is very wholsom.

July hath xxxi dayes.

Get Rue, Wormwood, and Gall, to ſtrew on your Floors, to deſtroy Fleas. At the Full Moon gather Flowers and Seeds, dry your Flowers rather in the ſhade, than in the Sun, which too much exhaleth their virtue; but to avoid corruption, let the Suns heat a little viſit them.

Beware of violent heat, and ſudden cold, which are the great diſtempers of this Month, and produce peſtilential diſeaſes. Forbear ſuperfluous drinking, but eat heartily; uſe cold herbs and meats, abſtain from Phyſick. Now the Rivers are more wholeſome than the Baths. In time of Peſtilence keep your Chamber Windows ſhut till the Sun have force of ſhining. Perfume your Chamber every morning with Tar, upon a Chafing-diſh of Coals. Uſe *Carduus Benedictus* boiled, and drink faſting.

Auguſt hath xxxi days.

Now with thankfulness reap your desired Harvest: Sow Winter Herbs in the New of the Moon. Esteem fair weather as precious, and misspend it not. Gather Garden-seeds near the Full. Use moderate Diet, forbear to sleep presently after meat. Take heed of sudden [illegible] after heat.

Beware of Physick and Blood-letting in the Dog-days, if the Air be hot; otherwise, if occasion require, you may safely make use thereof. Now moderate Diet is best. Beware of Surfeits, Heats and Colds, for Pleurisies are engendred thereby. Use not to sleep, much especially in the afternoon, for that brings oppilations, headach, agues, and Catharrs, and all notorious distempers of the same kind. Red Wine and Claret are excellent Remedies for Children against the Worms.

September hath xxx days.

The beginning of this month, & the end of the former gather Hops, their complexion being brown, and the weather fair, and no dew on the ground. Kill Bees, make Verjuice, remove and ſet all ſlips of Flowers between the two Lady-days; remove Trees from *September* till *Febr[illegible]ary*, eſpecially in the new of the Moon. The weather warm, and the Wind South or Weſt, cut Quickſets, gather ripe Fruit, ſow Wheat and Rye, Winter Parſnips and Carrots; and ſet Roſes, Strawberries, and Barberries.

Now as the year declines, provide your Winter Garments, hang them on looſly, to prevent that you might after repent of. Good for Phyſick and Phlebotomy.

Note; that *Venus* is our bright Morning Star, from the beginning of the year till *Auguſt* 24th, thence to the years end our bright Evening Star.

October hath xxxi days.

Sow Wheat and Rye, remove young Plants and Trees about the New Moon, observing this as a seasonable secret, that in setting, you carefully place that side to the South and West which were so before you took up the Plant; otherwise the cold kills it.

Advertisements.

MR. *Robert Bateman's* Famous Spirit of *Scurvy-Grass*, Plain and Golden, (which have performed so many eminent cures in the Dropsie, Scurvy and other Distempers,) are no where exactly prepar'd, but at the House he lately dwelt in, at St. *Pauls-Chain London*, nor sold by any but such as have it from thence, price One Shilling the Glass, beware of Counterfeits.

AT the same place is to be sold, by *John Hooker*, the truly prevailing *Elixir Salutis*, eradicating and subduing the most dangerous Diseases incedent to the Body of Man; being an Universal Medicine agreeing with all Complexions, Constitutions and Ages of both Sexes; and for that purpose more elaborately prepared and rectified than other Elixirs, going by the same name with Printed Directions for taking it, put in half Pint Bottles, Price 2 s. in *London* and forty Miles about, and 2 s. 6 d. in more distant places.

Set Crab-tree ſtocks to graft on: In the old of the Moon, ſet Peaſe and Beans, and ſow Parſnips and Carrots: Trench Gardens with dung, uncover the roots of your Apple-trees, and ſo let them remain till *March*. Kill Swine in or near the Full of the Moon, and the Fleſh will the better prove in the boiling.

The beſt Phyſick this month is good exerciſe, warm and wholeſome meat and drink; but if any diſtemper afflict the body, finiſh your Phyſick this Month, and ſo reſt till *March*, unleſs neceſſity urge: Uſe good meat, and wholeſome drinks to nouriſh the blood: Be ſure to go dry of your feet; for if not, (unleſs it be thoſe always uſed to it) be certain to be troubled with Rheums, and cold, and other inconveniencies attending.

In the last quarter of the Moon this Month and the next, are the best times to fell Timber: Let Fowlers mind their Game. Cover all your best Flowers and Herbs from cold and storms, with rotten Horse-dung. Look well to thy Cattle, blood Horses. Let a warm fire, and a cup of Nectar be thy Bath, the Kitchin thy Apothecaries Shop, hot Meats and Broths thy Physick, and a well-spread Table the proof of thy charity to thy poor Neighbors.

Advertisement.

BUCKWORTH's LOZENGES, famous for the cure of Coughs, Colds, Catarrhs, Hoarsness, &c. being also a great Cordial, and a Sovereign Preservative against all Contagious Distempers, Malignant Airs, and Unwholsom Weather. Well approved of by the chief Physitians of the College, to whom the true Receipt has been communicated by the Publisher hereof, and are now more faithfully prepared than ever since the Authors death, and sold also by James Shipton Apothecary at the Crown in Hatton-Garden.

THe *Spring Quarter* begins this Year *March* 9. 56 min. past midnight, at which time the *Sun* enters the *Equinoctial* Sign *Aries*, causing an equality of Day and Night all over the habitable World. *Summer* takes its beginning *Jun.* 11. 25 min. past 3 in the Morning, the *Sun* then approacheth our *Zenith*, and enters the first Scruple of the *Tropical* Sign *Cancer*, making longest Days with us, and shortest Nights. *Autumn*, or *Harvest Quarter*, commences this year, *Sept.* 12. 4 min. past 7 in the afternoon, and then touches the first Scruple of the *Equinoctial* Sign *Libra*, and again equalizing both the Day and the Night all over the habitable World. *Winter* begins *Decemb.* 11. about 7 in the morning, the *Sun* then touches the beginning of the *Tropical* Sign *Capricorn*, making the shortest Day and longest Night in the Year on this side of the *Equator*, as also the longest Day and shortest Night to them who Inhabit the *Southern* part of the World.

Of the Eclipses we may expect this Year 1690.

THere will be four Eclipses of this Luminaries this Year, but one of them visible in our Hemisphere; the first of the *Sun*, *February* the 28th, about 11 at night, but Invisible to us, yet may be seen in the *East Indies*, *China*, *Mexico*, *&c.* The Second of the *Moon* falls *March* the 14th a Quarter past 10 at Night, Digits Eclipsed, 5 36 12. It begins at 9h. 58. 1. ends at 11h. 33. 37. p. m. This *Eclipse* may be seen if the Air be clear all over *England*. The third *Eclipse* will be of the Sun, *August* 24th near one in the Morning, and therefore not visible to us. The Fourth is of the Moon, *September* the 8th, near 2 Afternoon, Invisible to us also, and therefore needs nothing more to be said of them.

Note, that *Venus* is our bright Morning Star, till *April* the 6th this Year, and then she becomes our bright Evening Star all this Year till *January* 22. 1691.

From London to Cambridge 44 miles, thus accounted;

FRom London to Waltham 12 miles, thence to Ware 8 miles, thence to Puckeridg 5 miles, thence to Barkway 7 miles, thence to Fulmire 6 miles, thence to Cambridge 6 miles.

From London to Oxford 47 miles, thus;

ARts and Sciences *Mathematical*, professed & taught by *H. Coley* at his *House* in *Baldwins Court*, over against the Old *Hole in the Wall* in *Baldwins Gardens*, viz. *Arithmetick*, *Geometry*, *Trigonometry*, *Navigation*, *Astronomy*, the Use of the *Globes*, and other *Mathematical Instruments*; also *Dialling*, *Surveying*, *Gauging*, *Measuring*, and the Art of *Astrology* in all its parts.

Memorandum the day & yeare
above writt at ye Temple Coffe house
That Mr Courtney
Lawyer did voluntarie
owne before Mr Rymer &
Mr Jancy & others
that he found ye rat
about midsummer in ye open
field & fiver: and for the
clamp & the end of it
her never saw it till it
was in print, but thought
it a good Conjecture.

When it appeared
yt this did not proceed
from Mr Brit, who gave
not instructions about any
such matter
